Supply Chain Analytics Dashboards

As of week ending 2026-10-04 · 12 warehouses · 120 SKUs · 104 weeks

Simulated data. The problems shown here were planted in the generator so the method can be demonstrated; they are not findings about a real company. Numbers come from the verified SQL outputs of this project.

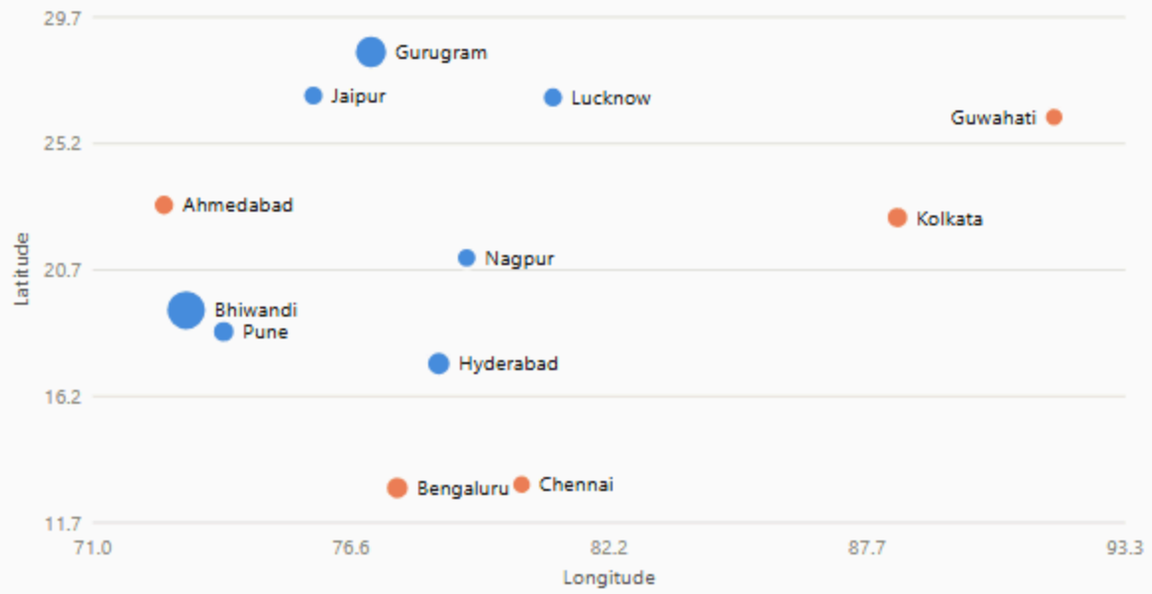

Executive Overview | Inventory Health & Alerts | Pipeline & Suppliers | Root Cause & Waste | Dark / light

⚠ **398** SKU lines are in deficit (27.6% of 1,440 lines) in the latest week, and **71** purchase orders are overdue.

Network fill rate	Revenue lost to stock-outs	Stock value	Deficit lines
97.25%	**₹39.6 Cr**	**₹27.5 Cr**	**398**
104 weeks	104 weeks	latest week, 2026-10-04	stock-out, critical or low, latest week

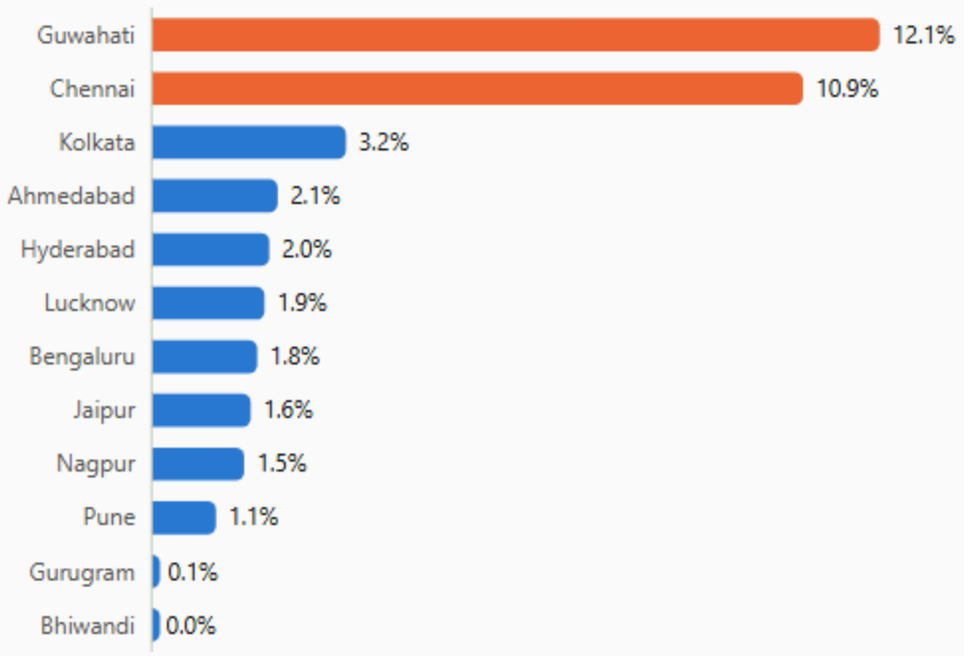

Where the stock sits

Bubble size = stock value, orange = more than 25% of lines in deficit. Positions follow longitude and latitude.

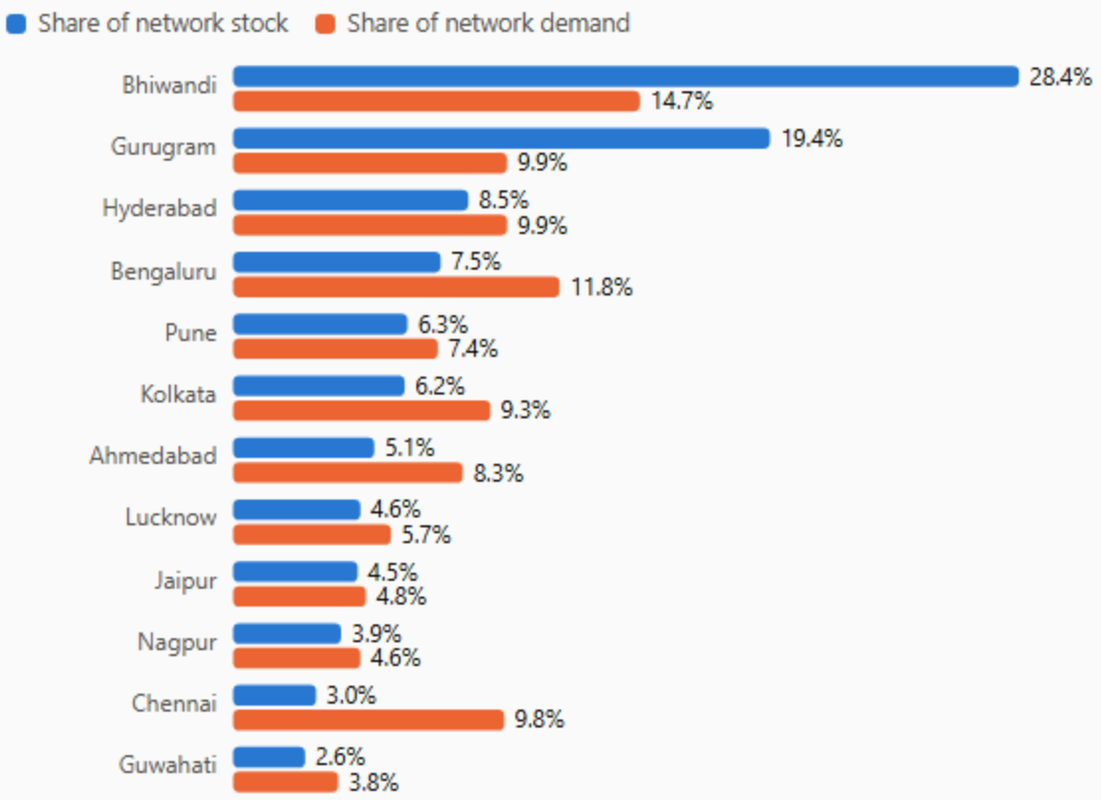

Demand lost to stock-outs

Share of demand not served, by warehouse. Orange = above 5%.

Stock share vs demand share

Bhiwandi and Gurugram hold far more stock than their demand needs.

Weekly network fill rate

Dips show festive peaks and supplier delays.

Simulated data. The problems shown here were planted in the generator so the method can be demonstrated; they are not findings about a real company. Numbers come from the verified SQL outputs of this project.

Executive Overview | Inventory Health & Alerts | Pipeline & Suppliers | **Root Cause & Waste** | Dark / light

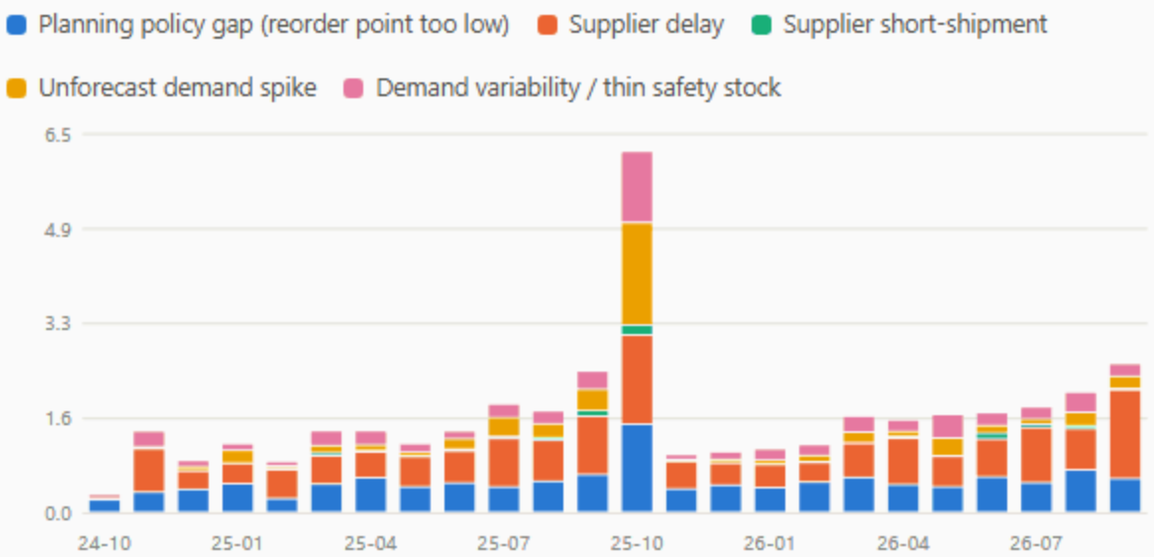

Why sales were lost

Lost revenue by primary root cause, 104 weeks.

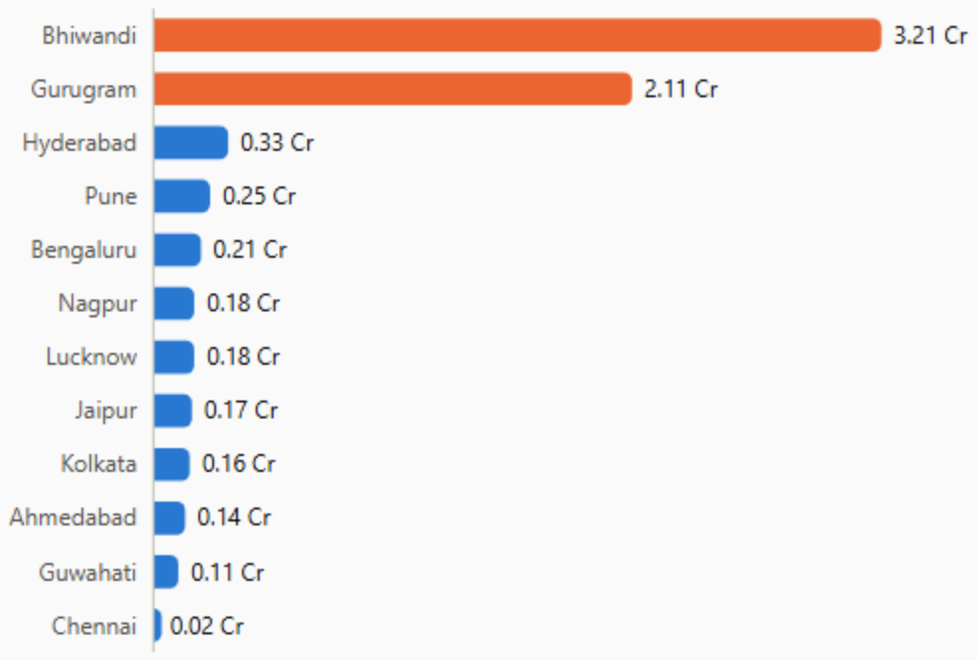

Lost revenue by month and cause

₹ crore. Festive peak and monsoon supplier delays are visible.

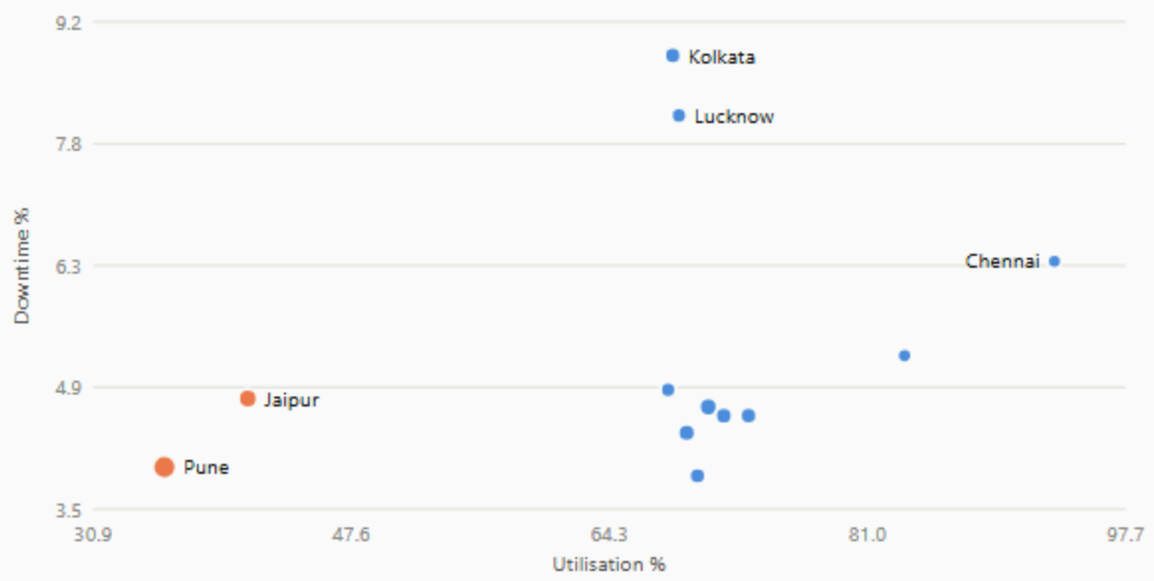

Stock above target cover

Value held beyond 4 weeks of demand, ₹ crore. Orange = more than 30% of the site's stock.

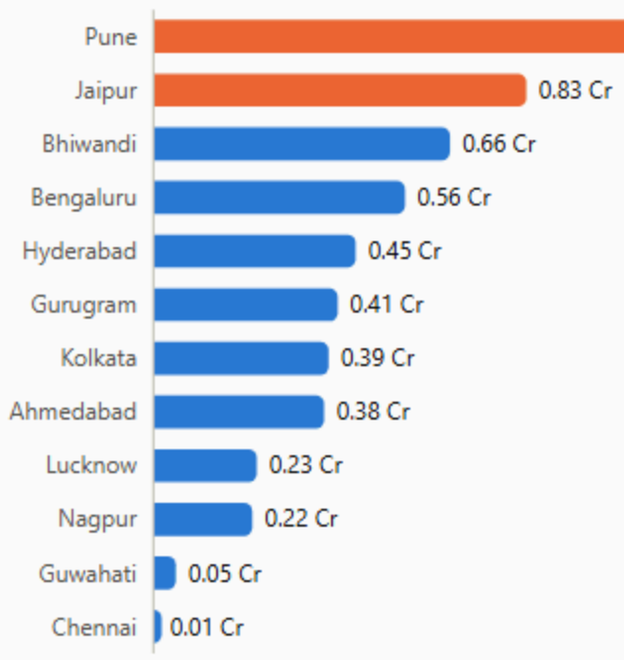

Asset utilisation vs downtime

Bubble size = idle cost; orange = 8 or more surplus assets.

Idle asset cost by warehouse

₹ crore over 24 months.

Recommended stock transfers

236 lines, 1,37,324 units, about ₹44.7 lakh net benefit (indicative). Top 15:
